

FREWEN SENIOR SCHOOL: A PARENT'S VIEW

“ When my daughter started at Frewen College her only previous school experience had been one of failure. She had struggled for many years in mainstream education and as the pressure of GCSE’s intensified so did her anxiety and her feelings of being unable to cope. Frewen College was the only school which was prepared to take my daughter at this late stage and I will always be eternally grateful for this.

It has been a joy and a source of great pride for me to watch my daughter’s transformation over her short time at Frewen. She has taken her GCSE’s in just 1 year and I have marvelled at her singing solos in the school concerts, taking grade 3 singing and achieving a distinction, performing in drama productions and at the incredible art she has produced. I have also been struck by her own remarkable resilience and her determination to have another try at things she has found so hard.

It is entirely due to the dedicated and patient teaching staff, the therapeutic and safe environment that is created, the time and thoughtfulness which is invested in every child. Of course there are still difficult days, worries and anxieties which don’t go away – but there is progress. This time a year ago, my daughter had no future, now we see a future full of opportunities for her and I can only say a massive thank you.”

Mrs M, Senior School parent.
